Greetings

* * *

With the start of another season I wish to express my sincere thanks and appreciation to the many friends and customers for the confidence and patronage given me in the past and to wish you all much dahlia pleasure and success in the coming year.

I always aim to offer only the best in new and standard dahlias and am continually adding the best of the newer varieties and eliminating some of the older kinds which have been superseded by newer and better kinds.

The improved dahlia of today is the fall flower supreme, making a gorgeous display in the garden from midsummer until frost and in a wider range of types and in sizes from the small one-inch to the large sixteen inch blooms. It is also fast coming to the front as a cut flower.

Dahlia roots grown in the Pacific Northwest are known the world over as the best.

All orders for dahlias will receive my personal attention.

CHARLES JULIN
